Hindi

PROFILE

Detail-oriented and motivated Frontend Developer with 1.5 years of experience in a startup environment. Skilled in TypeScript, Next JS, and GIT, I am actively seeking challenging opportunities that foster professional growth and allow me to contribute my expertise to innovative projects.

WORK EXPERIENCE

Frontend Engineer

BluePi Consulting Pvt. Ltd. 2023-Present

- Contributed to the development of the Pricing project, leveraging Next.js, TypeScript, and material UI to build scalable and efficient frontend solutions.
- Played a critical role in creating user interfaces and integrating complex business logic to meet client requirements for the Pricing module.
- Developed frontend components for the RxBenefits project, utilizing technologies including React.js, TypeScript, and Chakra UI.
- Managed version control using Git, Bitbucket and GitHub, ensuring smooth collaboration across the development team.
- Integrated APIs using Postman and communicated effectively with US-based clients through daily updates.
- Coordinated teamwork and collaboration using Slack, JIRA and YouTrack ensuring timely project progression and adherence to deadlines.

Projects

Pricing 2024--Present

Next.js, TypeScript, MUI, GIT and Bitbucket

- Developed dynamic front-end components using React and Next.js.
- Built reusable global components for consistency and efficiency.
- Integrated APIs for seamless data flow.
- Collaborated with UI/UX designers for user-friendly interfaces.
- Utilized Material-UI (MUI) for consistent design.
- Managed version control and collaboration using Git and Bitbucket.
- Optimized performance and ensured maintainability.
- Delivered high-quality code within strict timelines.

RxBenefits

TypeScript, React.js, Chakra UI

2023-2024

- Delivered features and enhancements on time using React, Chakra UI, and TypeScript.
- Integrated APIs and managed state with React Context for seamless data flow.
- Collaborated with cross-functional teams to design responsive UI and ensure user-friendly experience.
- Utilized Git and GitHub for version control and smooth team collaboration.
- Ensured high-quality code by following best practices and conducting code reviews.
- Optimized performance and maintained scalability of the application.
